Dear Jim,

What my company appreciated most in our experience with Construction Solutions, Inc., for Renal Research Institute's new kidney dialysis center, was your competence and respect to the construction timetable. It was comforting to know that, the weeks myself and/or my colleague Michael D. Harris, could not be on site, the project was in good hands and more importantly, on schedule.

Medical applications aren't the easiest projects to undertake, but your efforts and the final product, which was a result of strict conformance to our plans and specifications, were admirable.

I wish you and your company future success and if I can be of further assistance, please do not hesitate to call.

Sincerely,
